

Project title	AICRP – 14 Forest Fire Research and Knowledge Management
Principal Investigator	Shri.J.Sriram I.F.S.
Co-Investigators	-
Project duration (Start & End)	2019-2020 to 2024-2025
Objectives	<p>Objective 1: To conduct pilot research studies to generate baseline data on forest fires in selected fire vulnerable landscapes.</p> <p>Objective 2: Identification, mapping and categorization of fire prone areas in pilot study areas based on historical fire data and ecological model</p> <p>Objective 3: To upgrade existing Forest Fire Fighting Tools and develop new equipment's.</p> <p>Objective 4: Designing and development of strategy for awareness CAMPA, MoEFCC, Golign on forest fires in selected fire vulnerable landscapes.</p>
Progress	<ul style="list-style-type: none"> ➤ Procured a decade historical fire data from SFD's ➤ Preliminary survey has been conducted for site selection on burnt and unburnt in respective forest types as per data provided by SFD's for all selected 160 selected locations. ➤ Total 160 plots finalized and 33 points were surveyed and sample plots were made and samples collected for further action.
Funding agency	AICRP – CAMPA, MOEFCC, GOI - ICFRE
